4. John drinks 8 glasses of water each day. In each glass he puts in 2 ice-cubes.

How many ice-cubes has he used for the day?

5. Peter collects empty soda tins to recycle them. He gets paid N\$5 per tin.

If he collected 7 tins, how much money will he receive?

6. From one pot of soup mom dishes 5 plates. If she has to serve 40 people, how many pots of soup does she have to cook?

# Reading Comprehension

Read the story and answer the questions below.

## Sink or float

**Float means** = staying on top

**sink** = to go down at the bottom

Rocks are made of matter. Ships are too. A lot of things tell about matter. One thing is if it sinks or floats. When something is put in water, it pushes some of the water. Some things push away a lot of water. Some things push away a little. If they push away enough water, they float. If they do not, they sink like the rocks.

It can be hard to guess if something will sink or float. A ship is big, it weighs a lot. A ship looks like it cannot stay on top of water, but it does!

### 1. Look back in the passage.

- Write the word that means "to stay on top." \_\_\_\_\_
- Write the word that means "go to the bottom." \_\_\_\_\_
- Write the word that means "the opposite of pull". \_\_\_\_\_

### 2. Write "sink" or "float".
